#### Procedura per la posa/Procedure for the laying

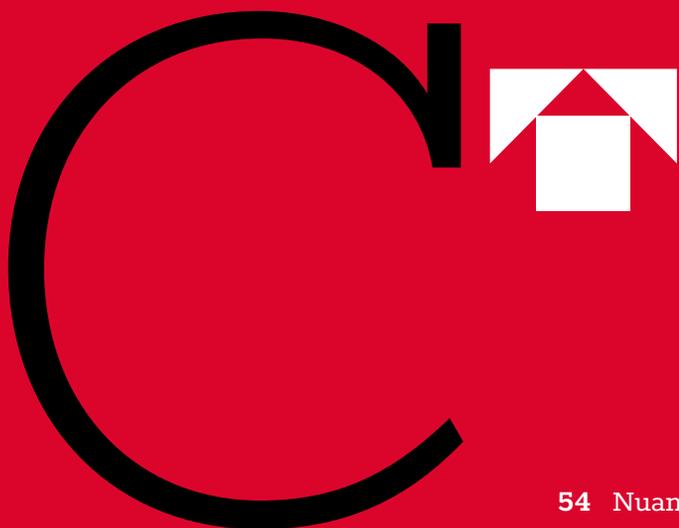

Al fine di prevenire qualunque tipo di problema connesso alla natura dello smalto utilizzato per ottenere la caratteristica finitura "craquelé", la collezione Stek deve essere trattata come descritto qui di seguito:

- 1 . posare le piastrelle;
- 2 . utilizzare esclusivamente un sigillante cementizio bianco;
- 3 . pulire accuratamente le piastrelle con un prodotto non acido (ad esempio Fila Cleaner);
- 4 . una volta che le piastrelle sono pulite ed asciutte stendere su di esse uno strato uniforme di prodotto protettivo (ad esempio Fila MP90).

In order to avoid any problem connected with the nature of the glaze used to obtain the typical "craquelé" finish, Stek collection must be treated as follows:

- 1 . lay down the tiles;
- 2 . apply only white cementitious grout;
- 3 . clean well the tiles with a non-acid product (such as Fila Cleaner);
- 4 . once tiles are clean and dry lay an uniform coat of protector (such as Fila MP90).

Geomat è prodotta per estrusione in modo totalmente artigianale; pertanto differenze superficiali, di tono, di calibro e imperfezioni di forma sono da considerarsi proprie del materiale e non difetti.

**ISTRUZIONI DI POSA**

1. posare il materiale utilizzando collante per gres porcellanato;
2. consigliamo di posare i pezzi avvicinandoli e distanziandoli in modo che risultino armonici e che creino automaticamente la fuga ideale;
3. caricare di collante non solo la superficie da pavimentare/rivestire ma anche il singolo pezzo per compensare le differenze di planarità che si potrebbero riscontrare in un prodotto trafilato;
4. stuccare le fughe e lisciarle con una spugna;
5. effettuare la pulizia finale fino a rimuovere gli eccessi di stucco ancora freschi;

Geomat is an extruded and handmade product; therefore any surface difference or any diversity in shade, caliber and imperfection of shape should be considered as peculiar of the product instead of defects.

**LAYING INSTRUCTIONS**

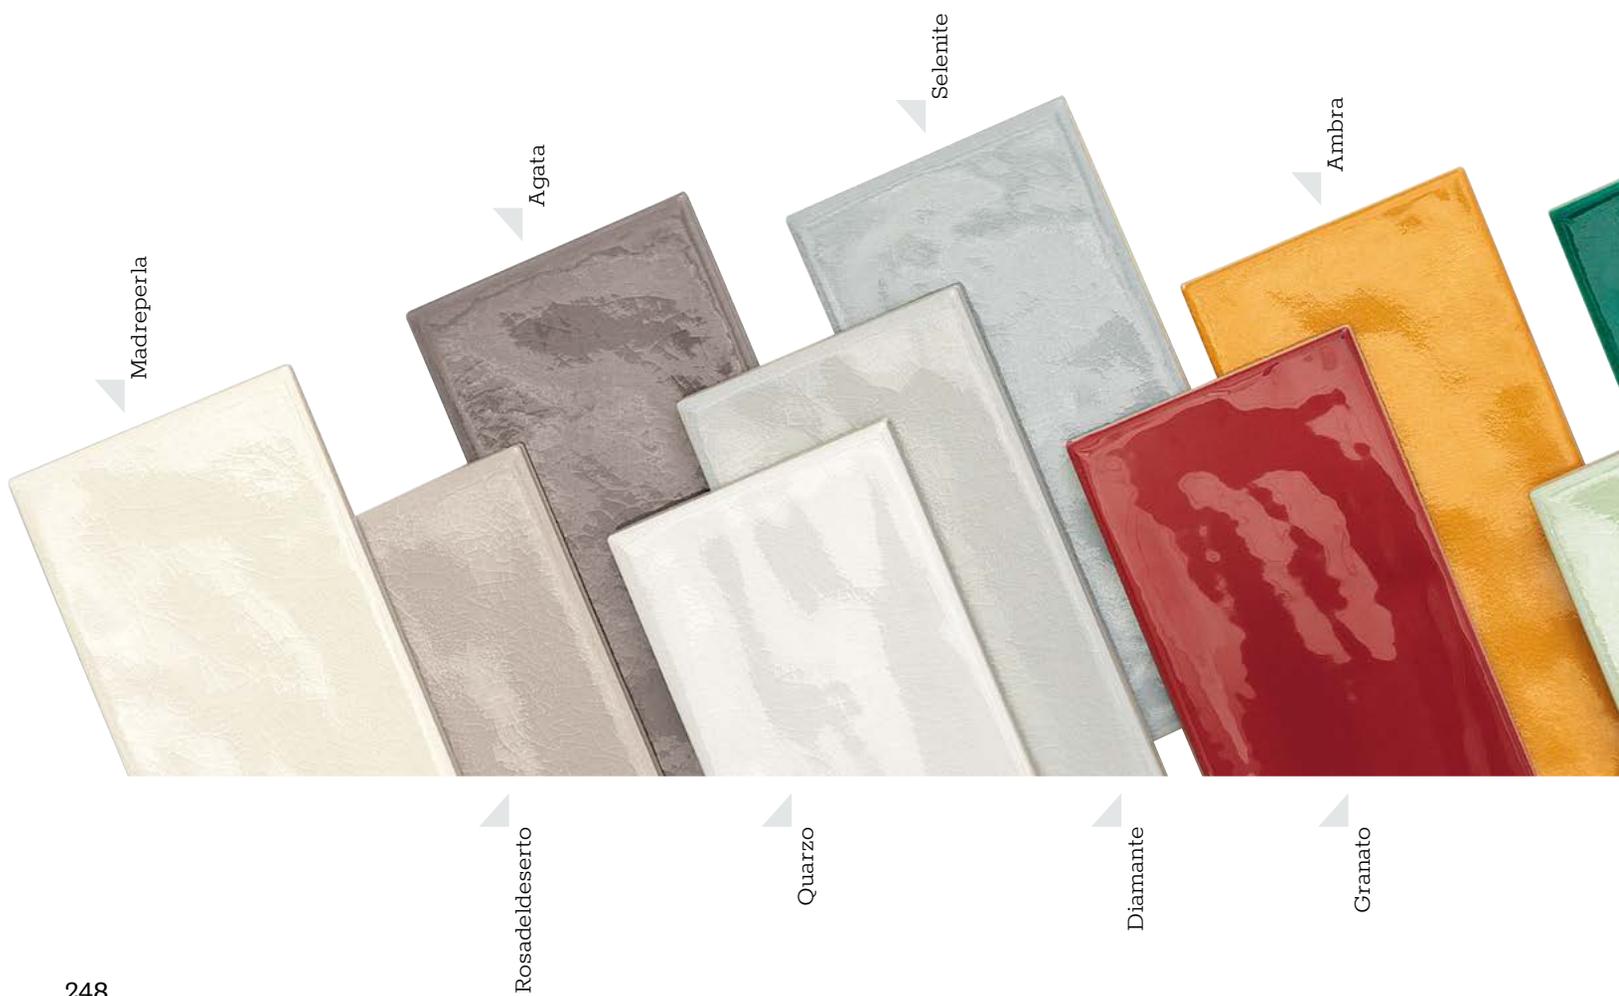

1. lay the material using a glue for porcelain ceramic tiles;
2. we recommend laying the pieces by bringing them closer and spacing them so that they are harmonious and automatically create the ideal joint;
3. load the adhesive not only on the floor/wall but also on the single piece to compensate different thickness of a drawn product;
4. level the joints using a sponge;
5. make the final cleaning with a sponge until all residual grout which is still wet has been removed.

### Procedura per la posa/Procedure for the laying

Al fine di prevenire qualunque tipo di problema connesso alla natura dello smalto utilizzato per ottenere la caratteristica finitura "craquelé", la collezione Briollette deve essere trattata come descritto qui di seguito:

- 1 . posare le piastrelle;
- 2 . utilizzare esclusivamente un sigillante cementizio bianco;
- 3 . pulire accuratamente le piastrelle con un prodotto non acido (ad esempio Fila Cleaner);
- 4 . una volta che le piastrelle sono pulite ed asciutte stendere su di esse uno strato uniforme di prodotto protettivo (ad esempio Fila MP90).

In order to avoid any problem connected with the nature of the glaze used to obtain the typical "craquelé" finish, Briollette collection must be treated as follows:

- 1 . lay down the tiles;
- 2 . apply only white cementitious grout;
- 3 . clean well the tiles with a non-acid product (such as Fila Cleaner);
- 4 . once tiles are clean and dry lay an uniform coat of protector (such as Fila MP90).

### Procedura per la posa/Procedure for the laying

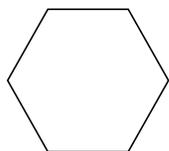

Al fine di prevenire qualunque tipo di problema connesso alla natura dello smalto utilizzato per ottenere la caratteristica finitura “craquelé”, la collezione Kraklé deve essere trattata come descritto qui di seguito:

- 1 . posare le piastrelle;
- 2 . utilizzare esclusivamente un sigillante cementizio bianco;
- 3 . pulire accuratamente le piastrelle con un prodotto non acido (ad esempio Fila Cleaner);
- 4 . una volta che le piastrelle sono pulite ed asciutte stendere su di esse uno strato uniforme di prodotto protettivo (ad esempio Fila MP90).

In order to avoid any problem connected with the nature of the glaze used to obtain the typical “craquelé” finish, Kraklé collection must be treated as follows:

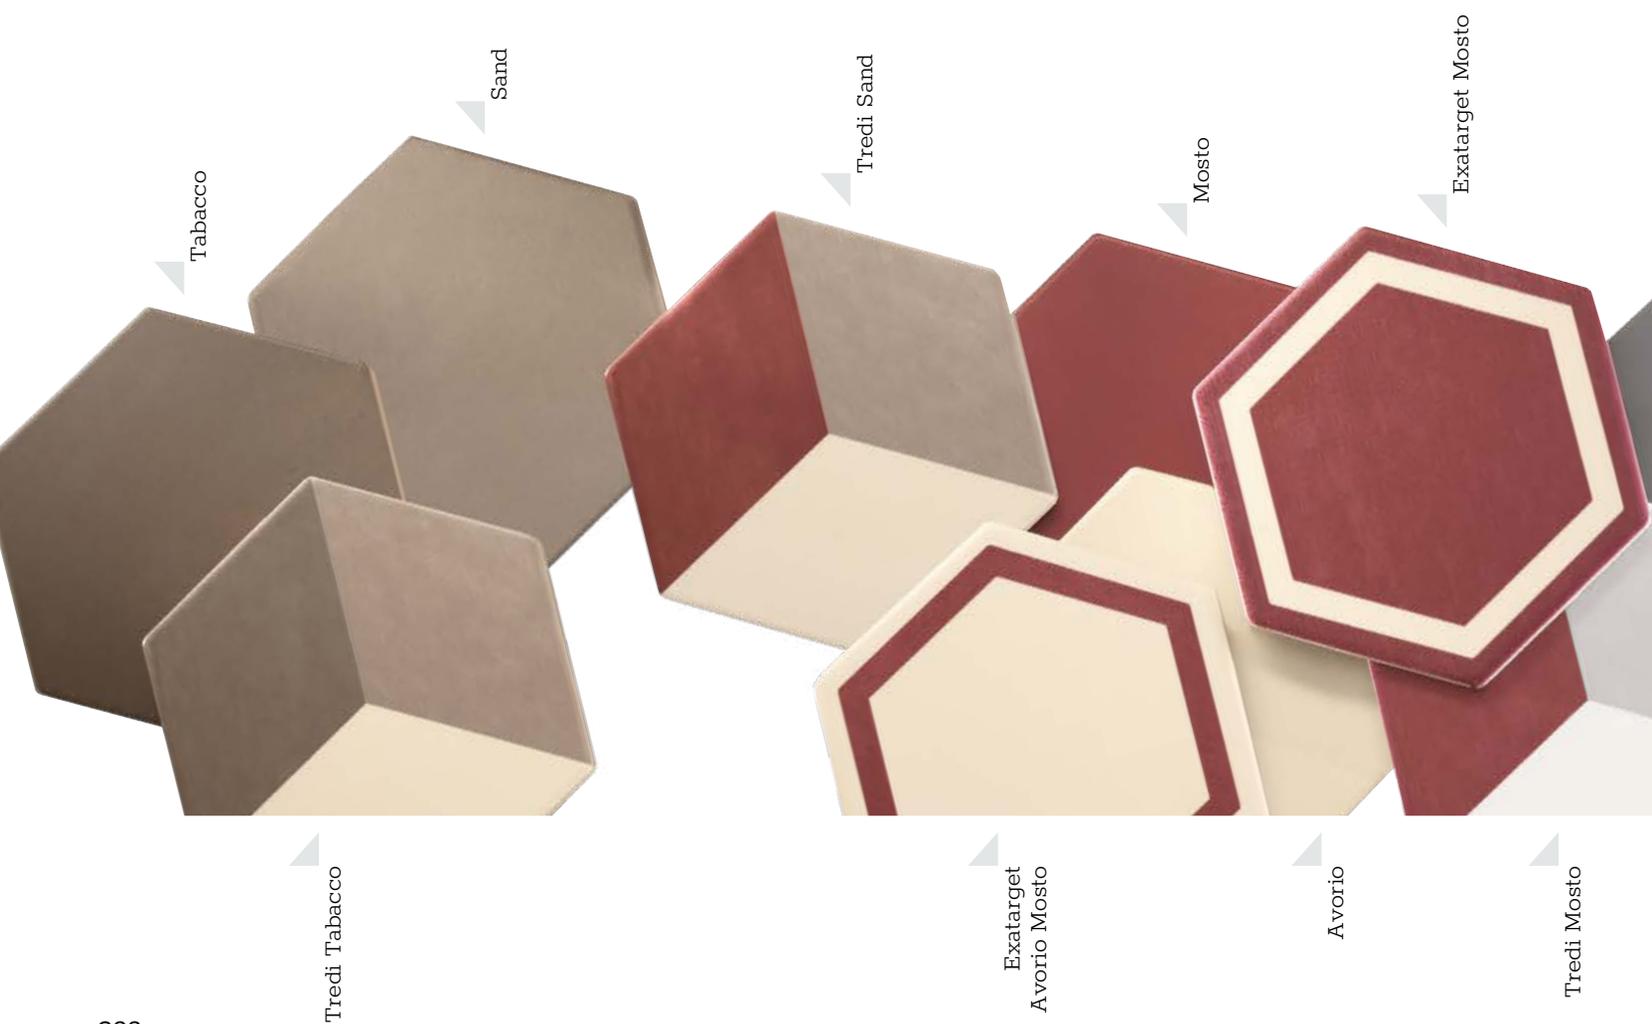

- 1 . lay down the tiles;
- 2 . apply only white cementitious grout;
- 3 . clean well the tiles with a non-acid product (such as Fila Cleaner);
- 4 . once tiles are clean and dry lay an uniform coat of protector (such as Fila MP90).

## Note generali/General note

I materiali lucidi possono essere soggetti a leggere rigature ed opacizzazioni che, non compromettendo la funzionalità delle piastrelle, non vengono riconosciute quali difetti del prodotto.

È opportuno che, dopo la posa in opera, le piastrelle vengano protette fino all'ultimazione di tutti i successivi lavori di cantiere (vedi idraulici, elettricisti, imbianchini, falegnami, etc.) onde evitare che la presenza di detriti produca danni allo smalto. Le piastrelle smaltate non vanno mai trattate con prodotti a base acida. Per la pulizia e manutenzione è sufficiente lavare con acqua.

Glossy materials may be subject to slight scratching and opaque patches which do not affect the functioning of the tile and should not be considered defects.

Following installation, tiles should be protected until all subsequent work is completed on the site (by plumbers, electricians, painters, carpenters, etc.) in order to prevent the presence of detritus from damaging the tile enamel. Enamelled tiles should never be treated with acidic cleaning products; simply wash them with water.
